# fully automatic AED Papercraft template

**Attention**

**Recommended age：8 years old and above**

- If a child makes the papercraft, an adult must make it together with them and give appropriate caution and guidance.
- When handling scissors, a utility knife, sharp objects, paper, etc., be careful not to get injured.
- We are not responsible for any injuries or accidents caused by using this product.
- This papercraft has some differences from the real AED so that children can easily assemble it.
- The papercraft does not have any functions of a real AED such as sounds or lights.

### ◎About various symbols

- valley fold line
- mountain fold line
- cut line
- tab to glue

### ◎About printouts at home

- Paper with a thickness of about 0.2 mm is suitable. (Thin paper such as copy paper is not recommended.)
- If you want to output the assembly instructions, you can use ordinary copy paper.
- When printing, set the magnification when printing with PDF viewing software to 100%.
- Prepare the required number of sheets and be careful not to miss any prints.

Glue these tabs　　The tabs surrounded by gray are glued to the external parts.
